SUMMARY

Full Stack AI Engineer shipping real-time voice and SMS agents, LLM-powered training platforms and production CRM backends (Python, Node.js, React.js): low-latency streaming over Socket.IO, barge-in, automated post-call evaluation with OpenAI GPT-4o and async, cache-backed APIs. Contributed to Anthropic LLM improvement projects, including Claude Code.

PROJECTS

Property Voice AI — real-time voice negotiation trainer | React.js, Node.js, Socket.IO, OpenAI GPT-4o Sept 2026

- Built a real-time voice negotiation trainer where users practice closing a real-estate deal against David, an emotionally adaptive AI seller persona powered by OpenAI GPT-4o.
- Implemented GPT-4o token streaming over Socket.IO with sentence-level TTS playback, plus barge-in via AbortController and voice-activity detection so user speech instantly cancels the active stream and audio.
- Designed an emotion state machine (5 seller moods) that adapts tone turn by turn, and a 5-dimension scoring engine (persuasion, clarity, objections, closing, engagement) for actionable post-call feedback.
- Added resilience: mock-AI fallback on OpenAI errors, browser TTS fallback, and incomplete-utterance handling.

PDF-Chat Application — conversational document querying | FastAPI, LangChain, React.js, PostgreSQL May 2024

- Engineered a full-stack PDF chat application using FastAPI, React.js, PostgreSQL and the Google Drive API; integrated LangChain for NLP processing, achieving an 85% response relevance rate.
- Leveraged FastAPI's asynchronous capabilities to reduce API response times by 50%; implemented secure storage via Google Drive API, supporting 50MB documents with 99.9% data integrity.

EXPERIENCE

Software Engineer, Freelance Software Development Jan 2026 – Present

Property-tech CRM — lead management, calling infrastructure and AI voice / SMS agents for inbound and outbound engagement.

- Architected backend workflows for a property-tech CRM, automating lead-generation pipelines and cutting manual processing by 70%.
- Built RESTful APIs and CRUD architecture for lead and contact management over 10,000+ active records at sub-200ms average response; optimized API performance by 40% via scheduled caching and upsert-based database sync.
- Engineered a production-grade softphone with call lifecycle and real-time state tracking, extended into full call infrastructure (automated dispositions, async jobs, lead/campaign sync), improving operational efficiency by 35%.
- Engineered an end-to-end Power Dialer that initiates campaign calls, manages call states and dispositions, and advances to the next eligible lead without manual intervention, increasing agent talk-time efficiency by 50%.
- Built an AI Call Training platform with configurable personas and scenarios plus automated post-call evaluation using OpenAI models, cutting onboarding time by 30%.
- Implemented real-time AI voice and SMS agents for inbound and outbound leads on low-latency models that keep conversational context, improving lead response time by 60%.
- Refactored time-intensive operations into asynchronous background jobs, increasing throughput by 45%; strengthened data integrity with optimized indexing and transactional patterns, cutting inconsistencies by 60%.

Full Stack Developer, Cloudnexus Dec 2024 – Oct 2025

- Spearheaded Jobra AI, an ML-powered applicant tracking system (ATS), improving applicant-matching accuracy by 45% and cutting screening time by 60%.
- Collaborated with Anthropic on LLM improvement projects, including Claude Code: refactored GitHub repositories and integrated human-in-the-loop feedback to improve model performance.
- Delivered a Threat Management System with 2FA, RBAC, Excel ingestion and dynamic visualization (React.js, Redux Toolkit, Node.js, MongoDB), achieving 40% faster processing.
- Applied prompt engineering to streamline AI-assisted development workflows, accelerating delivery by 30%.

TECHNICAL SKILLS

Agentic AI	LangChain, LangGraph, MCP, tool calling, RAG, LLM evaluation, prompt engineering, OpenAI GPT-4o
Voice & Real-time	Real-time voice / SMS agents, WebSockets (Socket.IO), Web Speech API, TTS, barge-in, voice-activity detection
Languages	Python, TypeScript, JavaScript, SQL, C/C++, HTML/CSS
Backend	FastAPI, Node.js, Express.js, Nest.js, RESTful APIs, async processing, background jobs, RBAC, 2FA
Frontend	React.js, Next.js, Redux Toolkit, Tailwind CSS
Data	PostgreSQL, MongoDB, MySQL, caching, indexing, upsert-based sync
Cloud & DevOps	Docker, AWS, Git, CI/CD

EDUCATION

Oriental Institute of Science and Technology Jul 2020 – Jun 2024

Bachelor of Technology in Computer Science (AIML), CGPA: 7.9/10

ADDITIONAL

- **Internship:** Full Stack Developer Intern, Stackmentalist — launched the company website (Next.js, Next-Intl, Tailwind CSS) and built RESTful APIs for a CRM system, documented with Swagger.
- **Certifications:** C++ Specialization (Coursera); DBMS Essentials (Coursera); Programming Essentials in Python (OpenEDG).
